

**Amendments to the Specification:**

Please replace paragraph [80] on page 16 with the following amended paragraph:

At P522, a determination is made that a third component exists and P528, P510 and P520 will be performed in the same manner as was done for the first component.

Please replace paragraph [87] on page 18 with the following amended paragraph:

Another feature that can appear in the output cache directive is “VaryByParam”. The “VaryByParam” feature is similar to the “VaryByControl” feature, but indicates that output caching is to occur according to the values of the parameters listed with the “VaryByParam” feature. The following examples help to clarify this feature.

Further, if the “VaryByParam” feature is used with the setting “\*”, caching is varied by every key/value permutation in a query string or by values that are sent from a web browser when using a <form> with method equal to HTTP POST or GET.
